9		processing information for said second revised order.

regarding at least one product and entering an initial product order

including information dentifying a product and quantity being ordered;

3

4

displaying a promotion screen at the customer side containing information regarding at least one selected promotion when the initial product order has a selected characteristic but not otherwise providing for the entry of a revised product order at the customer side following a display of said at least one selected promotion; and completing the sales transaction in accordance with said revised product order when such is entered but in accordance with the initial product order when the at least one selected promotion was not displayed because the initial product order did not have the selected characteristic or when no revised product order was entered, but processing the sales transaction in accordance with the revised product order when such was entered.

- 16. A method as in claim 15 in which said characteristic includes a quantity of products included in said initial product order.
- 17. A method as in claim 16 including displaying at the customer side a promotion screen for a retail sales transaction when said selected characteristic is indicative of a retail order but a promotion screen for a business-to-business sales transaction when the selected characteristic is indicative of a business order.
- 18. A method as in claim 17 in which the selected characteristic is at least one a quantity of a product and a total price of said initial product order.
- 19. A method as in claim 18 in which said promotion screen is for retail transaction when at least one of a quantity of products and total price of said initial product order is within a first range but is for a business-to-business transaction when at least of a quantity of product and a total price of said initial product order is in a second, higher range.

20.

/
A system for promoting product sales in Internet transactions comprising:
a customer side computer facility and a seller side computer facility each coupled
with the Internet and sending information to the other only over the
Internet;
said customer side facility having a display for information received from the
seller side facility and an information entry device for entering information
sent to the seller side facility through the Internet;

said customer side facility sending to the seller side facility information indicative of an initial order for a product and, depending at least on the quantity of the product, the seller side facility responding by executing the order or sending to the customer side facility information describing at least one promotion functionally related at least to said quantity;

said customer side facility selectively responding to said information regarding said promotion by sending to the seller side facility information indicative of a revised order conforming to said promotion; and

said seller side facility responding to a revised order from the customer side facility by executing the revised order rather than the initial order.
